PROFILE

Living, learning, & leveling up one day at a time...
Ambitious, friendly, and kamunikativny. Quick study of new information and solving complex issues with all ambitions and creative approach. Extensive experience in the theory and methodology of website development. I have extensive knowledge of HTML, CSS (SASS), entry-level in ECMAScript, UI/UX

ABOUT ME

Greetings, my friend.
Since the beginning of my journey as a front-end developer for more than 6 months, I have been diligently studying and improving my skills in this direction every day to become a guru in this difficult task. I bring great pleasure to code and create beautiful things from scratch, to solve puzzles that appear during work on a project, and of course a happy user is a cherry on the cake. I am firmly convinced that you can create websites and web applications that will not only look very cool, but will also be very pleasant in interacting with the user and I will put all my knowledge and hand to it :)
ps. ... and I like what I do!

EDUCATION

Academy of Engineering
Specialty heat power engineering • September 1/2007 - June 25/2012.
